### Updates on Our View this month

Explained

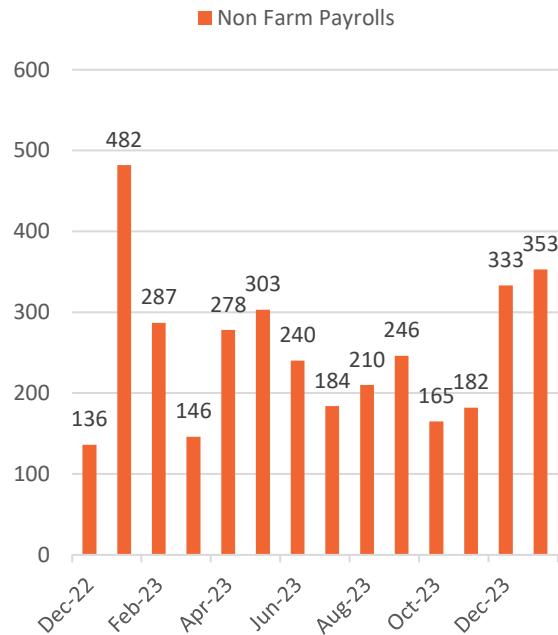

No	Thesis	Feb'23 Update
1	<b><i>The US is slowing, US disinflation continue, USD could weaken further, however...</i></b>	
a	<i>US economy cenderung melambat, sejalan dengan masih ketatnya kebijakan moneter, berkurangnya support fiscal, dan berlanjutnya trend penurunan job market.</i>	Data ekonomi masih terlihat kuat
b	<i>Financial condition terlihat menjadi lebih longgar sejalan dengan reversal yang tajam di US equity market dan US bond market. Sementara USD juga terlihat menguat.</i>	Hal ini diakibatkan buffer liquidity yang masih ada di Federal Reserve Repo
c	<i>Employment dan housing, di 3 bulan ke depan menjadi semakin penting untuk membaca arah dari kebijakan moneter di US dan tentunya USD ke depannya.</i>	Kami melihat penting untuk melihat data ekonomi pasca excess liquidity sudah minim
d	<i>The Fed masih cenderung untuk menahan suku bunga sampai ada sinyal yang jelas bahwa US economy tumbuh negative ataupun inflasi telah kembali ke level yang The Fed targetkan.</i>	
2	<b><i>Global Trade Recovery yet to be seen means continue soft commodity price</i></b>	
a	<i>Perlambatan volume perdagangan global mulai terlihat, dengan momentum yang negatif. Sulit untuk mengharapkan harga komoditas untuk recover dalam waktu dekat.</i>	
b	<i>Cash cost dan beberapa komoditas memiliki dinamika yang berbeda</i>	
3	<b><i>Resilient Economy with K-Shaped Recovery Clouded by Election Uncertainty</i></b>	
a	<i>Dibandingkan G20, Indonesia mencatatkan pertumbuhan relatif diatas mempertimbangkan perlambatan global. Namun Investor tetap harus berhati-hati karena recovery tidak terlihat sama untuk setiap segmen.</i>	
b	<i>Wait and see. Namun, kami melihat structural improvement yang terjadi dalam 5 tahun terakhir i.e hilirisasi masih akan berlanjut yang diharapkan menjadi sumber pertumbuhan dan pendanaan kedepan.</i>	Hasil quick-poll mengindikasikan 1 putaran dimana positif secara sentimen terhadap IHSG

- ⚠️ Konsensus saat ini memiliki ekspektasi *rate cut* berkisar dari Mar-Jun'24. *Thesis higher for longer* mengakibatkan dollar terapresiasi dimana DXY telah mencapai level 104.
- ⚠️ Kami melihat ini masih positif bagi EM, karena setidaknya konsensus masih melakukan *pricing-in* 4x *cut-rate* sepanjang 2024.

- Kedua chart diatas merupakan salah satu dugaan kami yang mengakibatkan ekonomi US lebih *resilient* dibandingkan ekspektasi pasar. Terlihat likuiditas pasar menurun dari 2.5trn USD sampai ke level 800bio USD. Kami juga melihat posisi LDR US Banking saat ini berada di level yang rendah kisaran 68.4% walaupun tidak dapat dipungkiri *marketable securities* mencangkup sampai dengan 29% dari total deposit.

## What to expect for this year

### Updates on Our View this month

Explained

No	Thesis	Feb'23 Update
1	<b><i>No more higher but restrictive for longer. Market will be driven by data trend to rally.</i></b>	
a	Dalam 1-2 bulan terakhir, terlihat perubahan komunikasi dari <i>Fed member</i> mengkonfirmasi ekonomi dan kondisi finansial di US yang melambat. Pasar menginterpretasikan bahwa Fed saat ini sedang menunggu <i>timing</i> untuk melakukan normalisasi kebijakan moneter.	<i>Thesis intact</i> , terlihat dari data surprise yang tidak terlalu mempengaruhi level yield. UST 10Y : 4.1-4.2
b	Menurut kami, <i>Softlanding</i> (NFP menuju 100k, core PCE 3%) cukup untuk menjadi dasar Fed menjustifikasi <i>cut-rate</i> 1-2x. Kami melihat hal ini positif terhadap EM.	
2	<b><i>Curve should be slight steepening along with cut-rate</i></b>	
a	Apabila global resesi yang diikuti oleh <i>bottoming commodities and cut-rate</i> , umumnya <i>term spread</i> cenderung <i>steepening</i> . Namun, kami melihat hal akan terjadi setidaknya selama 2 tahun.	
b	Namun, normalisasi <i>current account</i> menjadi <i>deficit</i> di level 1% berpotensi dan komparasi dengan <i>credit spread</i> bisa melebar (MXN, INR, SAR) <i>filter negatif CAD with BBB rating. Chart CAD with spreads of 4 country.</i>	Saat ini US-Indo 10Y <i>spread</i> dilevel 260bps kami melihat masih ada potensi <i>upside</i> ke 280-300bps
3	<b><i>Domestic Supply Increase wasn't that bad especially foreign inflow came back</i></b>	
a	Meningkatnya <i>gross-supply</i> awalnya kami khawatirkan dapat mengakibatkan tekanan dari sisi yield. Namun mempertimbangkan realisasi APBN yang lambat dan asumsi keberlanjutan penggunaan SAL. Peningkatan <i>gross bond-supply</i> kami rasa menjadi <i>manageable</i> .	Kabinet pemerintahan baru perlu diamati apabila terdapat perubahan signifikan dalam outlook fiskal defisit kedepan
	<b>Berdasarkan hal diatas, kami melihat nilai wajar untuk INDOGB 10YR berada di level 6.6-6.7 hal ini mengasumsikan softlanding, at least 2 FFR cut-rates, brief rally on IDR. Hal ini dikarenakan kami melihat cut-rate akan lebih menjadi multi year cut-rates menyesuaikan ekonomi US.</b>	<i>Maintain</i>

## What to expect for this year

### Updates on Our View this month

Explained

No	Thesis	Feb'23 Update
	<b><i>Earnings Growth and Valuations might not Be Enough to Drive Equities Much</i></b>	
1	Kami melihat emiten IHSG secara <i>aggregate</i> dapat menghasilkan laba dari 7.5 – 12.5% di tahun 2023F melambat di bandingkan tahun ini yang cukup surprise di level 10-17.5% per 9M23. Mempertimbangkan <i>higher for longer</i> , kami melihat baiknya untuk konservatif mengasumsikan valuasi IHSG di 14.10x untuk tahun 2024F. Hal ini termasuk memperhitungkan faktor non-fundamental yang belakangan ter-refleksi di indeks.	<i>Maintain, Banks management guidance</i> mengisyaratkan adanya pertumbuhan dari ekonomi ( <i>loan growth story</i> )
2	Berdasarkan hal diatas, kami melakukan <i>downgrade</i> atas IHSG 2023F menjadi 7,100 dan Target IHSG 2024F di level 7,800. Dari sisi strategi pengelolaan kami masih pentingnya kapasitas portfolio untuk fleksibel dimana dua fokus strategi : 1) <i>Bottom-up/Stock Picking Strategy</i> , 2) <i>Interest Rate Cut Play along with end of rate cycle</i> .	Maintain
3	Weighting yang semakin besar dari saham-saham yang secara free float tipis, namun mengalami kenaikan yang signifikan, menarik likuiditas investor, baik local, terutama retail, maupun global, terutama passive funds, yang membuat kinerja IHSG ter-distorsi dan resiko volatilitas pasar meningkat.	
4	Masih <i>relative volatile</i> nya USD disertai dengan perlambatan pertumbuhan ekonomi secara global mengharuskan investor mengantisipasi 1) <i>External macro shock</i> , 2) <i>No-upside on valuation at the moment</i> , 3) <i>Tight domestic liquidity means volatile market on JCI</i> .	
5	Posisi investor <i>global</i> yang cenderung masih <i>underweight</i> di <i>asset class equity</i> secara <i>global</i> mengakibatkan <i>upswing</i> yang cukup cepat disaat <i>cut-rates</i> menjad lebih jelas. Konsensus saat ini memiliki ekspektasi pelonggaran terjadi di 2H24F.
